

2 Feeling blue

Use wallpaper for instant impact! Give your room a brave focal point with sky blue shades inspired by the beauty of a Mediterranean landscape

Update an old coffee table with some spare wallpaper to add a splash of colour

Line a plain bookcase with some striking wallpaper to get a designer look for less

Give a tray a new lease of life with a coat of paint and some wallpaper

Highlight any architectural features, like a chimney breast, with some stand-out wallpaper designs to wow the room. Since you're not papering an entire wall, you can be as bold as you dare with some striking geometric patterns. Pick out the key colours from the wallpaper and accessorise the rest of the room to bring the whole scheme together. If you're living in rented accommodation but love the idea of wallpaper, transform a large bookcase with wallpaper or even a coffee table to add your favourite patterns. If you like an aged, distressed feel, you'll love this peeling planks wallpaper in aqua that instantly adds character and texture to an Ikea bookcase. You'll only need half a roll, so do ask in your local DIY store if they're selling discounted opened rolls.

'Pack a punch with a geometric print in sea blue hues inspired by nature. Pick out one or two shades to decorate the rest of the room for a cohesive scheme'
